**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of Group I, Species V, claims 16 and 18 in the reply filed on 06/06/2005 is acknowledged.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Line 7 and 8, it is not distinct which "item" Applicant is referring.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawasaki et al. 6,061,887.

Kawasaki '887 discloses a method for scheduling the picking/transporting of a plurality of items specified for a subsequent item shipment per claimed invention comprises: selecting a first period during which the first-picked item is expected to arrive

at an assembly location, when the first-item is picked; designating a picking period for the subsequent items other than the first-picked item a picking period, when shifted forward in time by an amount of time the subsequent items will take to arrive at said assembly location once picked/transported, falls completely within the first period of time. However, Kawasaki '887 is silent as to the specific of the assembly location being a sorting location. Nevertheless, it is obvious that the assembly location could be categorized as a sorting location if any type of sorting is done at said assembly location.

In regards to claim 18, the picking period designated for the subsequent items begins later than does the first period of time.

6. Claims 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirschner 6,425,226.

Kirschner '226 discloses a just-in-time method for picking of a plurality of items specified for shipment. The picked items are delivered to a sorting and packaging location. Each picked item comprises a pick period. It is obvious that at least one subsequent picked item and its pick period, when subtracting out the traveling time to said sorting location, would fall completely within the first period of the first-picked item, based on at least coincidental occurrence. The first period of the first-picked item is defined as the traveling time of the first-picked item.
